READER LEVEL: Beginning to Intermediate

“Why not do it yourself?”

Wouldn't you like to be able to edit your own photos on your computer like the experts do? The main thrust of this book is to empower the brand spankin' new Photoshop® user to employ the Top-40 most requested techniques in a user friendly, “get it done now without having to know any more than you have to” fashion. You can begin using Photoshop® **right now** without having to know anything about the program. Just find what you want to do in the table of contents, go to that page and do it! You now have in your hands the power to end your Photoshop® frustration.

You will discover how EZ it is to use the “industry standard” program to:

- EZ> Fix a color cast, resurrect old or faded photos and more powerfully adjust the brightness and contrast.
- EZ> Get rid of unwanted parts of a photo (retouching) like telephone wires or blemishes.
- EZ> Scan photos directly into Photoshop®, crop and straighten photos perfectly – first time, every time.
- EZ> Put photos inside of text and add special effects like drop shadow, bevel and emboss, outer glow, etc.
- EZ> Get rid of the “white box” around images for inserting into PowerPoint® or desktop publishing programs.
- EZ> Make an entire web site from your digital camera (or scanned) images - *automatically!*
- EZ> Make vignettes and much, much more!

“Even I could understand what was being said and I usually cuss, swear and try to throw the computer across the room. Finally, a well written and detailed guide to those who are not always compatible with their computers. David Humes has done a great service to help anyone look professional with little effort. Imagine, software that I can use to make myself look thinner in pictures! What more could a woman want?”

– **Dianne Schwartz**, Author: *Whose Face is in the Mirror?*

“I just finished reading David Humes’s new book, Photoshop EZ, and I have to say I was totally blown away by the clarity and simplicity of the step-by-step instructions that David offers the readers. As a nationally recognized marketing expert, I have to admit that I am techno-phobic. David demystifies the complexities of Photoshop to the point where even I can use the program to its maximum.”

– **Jim Ziegler**, President, The Ziegler Corporations Atlanta

“We have been waiting for something like this for long time! With Photoshop EZ you rapidly find solutions to the most common problems confronting today’s pre-press operators. If you find yourself looking for a quick, concise Photoshop reference manual, look no further. Photoshop EZ is well structured and it explains the most requested Photoshop techniques in an easy to understand manner. We consider it one of our wisest investments this year.”

– **Paul Peinado**, Newspaper Art Director, Zurich, Switzerland

David Humes is an Adobe Certified Expert (ACE) in Photoshop and has been using Photoshop since early 1996 (version 2.5 - no layers). He has taught hundreds of full day Photoshop, computer graphics and web design seminars for thousands of people in 48 of the 50 United States and throughout Canada since August 1999. David has conducted training seminars for Johns Hopkins University, the U.S. Army, the training staff of ITT Technical Institute, and countless others. Other seminars include Macromedia Dreamweaver, Macromedia Flash, Time Management and Stress Reduction.

Even if you don't have the program, chapter one tells you how you can get started now and use Photoshop **FREE** for 60 days!

What are you waiting for?
